

Davenport Lift Control

Tel: 02085048286 Fax: 02085048297

The purpose of this stylish standalone unit is to improve security in public buildings where restricted access is required. This unit can be used to isolate the lift push buttons simply by holding a programmed fob or card over the reader and the volt free contact will close for the time period programmed. This would be typically 3 seconds.

Specification

- Surface mounted Reader
